

Construction and Demolition Debris Recycling in Camarillo

Construction and Demolition (C&D) projects generate large amounts of solid waste. Most of the material is recyclable, including asphalt, concrete, wood, cardboard, and metal. Recycling C&D material instead of landfilling reduces disposal fees, extends the life of our local landfills, and provides valuable materials for reuse and recycling. Under Chapter 9.07 of the Camarillo Municipal Code, any person engaging in a construction or reconstruction project in the City of Camarillo that generates C&D material is required to: (1) provide containers for the temporary storage of such material; (2) separate materials that may be recycled; and (3) arrange for the collection or hauling of such recyclable materials.

ROLL-OFF BIN PROGRAM

The City encourages contractors to use E.J. Harrison roll-off bins whenever possible for residential construction and demolition. E.J. Harrison has an exclusive residential franchise agreement with the City and is required to divert as much recyclable material as possible from their roll-off bins. For commercial and industrial roll-off bin service, the City has non-exclusive roll-off franchise agreements with the following companies: *E.J. Harrison, G.I. Rubbish, J&L Hauling*. All roll-off bins containing mixed C&D material must be sent to a state approved recycling center or transfer station where the material is to be sorted for proper recycling. In general, a typical load of mixed C&D material has over 50% of debris that can be sorted for recycling.

For larger projects, contractors are encouraged to use multiple roll-off bins and segregate the C&D material on-site. Segregated loads of concrete and asphalt, dirt, wood, and metal are hauled directly to recycling facilities with low or no tipping fees, which reduce project costs.

* E.J. Harrison: (805) 647-1414
**Waste Management (GI Rubbish): (805) 522-9400
**J&L Hauling & Disposal (818) 470-9356 or (818) 470-9504

* Roll-off box service available for residential, commercial and industrial zones.

**Unscheduled, temporary commercial& industrial roll-off box service.

SELF-HAUL

All contractors that self-haul must provide for the collection of solid waste and recyclable materials and separate the following materials from the waste stream at the construction site for recovery and/or recycling and/or reuse: asphalt, concrete; wood, brush, and lumber; dirt, earth, gravel, and rocks; masonry; metal; and cardboard. The materials must be hauled to local recycling facilities.

The following facilities accept segregated materials:

California Wood Recycling – accepts lumber, trees, and brush

1. 12390 Telegraph Rd. (corner of Olive Road and Telegraph Road)
Santa Paula, CA 93060

2. 6859 Arnold Road
Oxnard, CA 93033
(805) 650-8852

Please call ahead for times and requirements.

Vulcan Materials – accepts clean asphalt and concrete
6029 E. Vineyard Ave.
Oxnard, CA 93036
(805) 647-1121
Please call for hours and pricing.

Standard Industries – accepts all metals
1905 Lirio Avenue
Ventura, CA 93004
(805) 643-6699

Gold Coast Recycling and Transfer Station

5275 Colt Street
Ventura, CA 93003
(805) 642-9236

Accepts segregated and mixed loads of C&D debris. Gold Coast will pay for clean loads of cardboard, plastic, aluminum & paper.

Habitat for Humanity Re-Store

1850 Eastman St.
Oxnard, CA 93030
(805) 485-6065
