April 10, 2020

Dear Fellow Residents:

Last evening, April 9th, our Ventura County Public Health Officer issued an updated Stay At Home Order. His intent is that the maximum number of people stay in their homes to the maximum extent possible. Dr. Levin acted to slow the spread of COVID-19 and mitigate the impacts of the pandemic on the delivery of critical healthcare services to those in need.

Dr. Levin’s order supplements and amends existing orders to, among other things: prohibit all gatherings, no matter the size, outside of places of residence with limited exceptions; add certain businesses to the list of essential businesses; require essential businesses to adopt and implement social distancing protocols; provide guidance for hospital holding units and long-term care facilities; and declare that violations of the Order are a threat to public health and a public nuisance.

Please do your part and stay at home to the maximum extent possible. Dr. Levin also requested that if you leave home for an essential matter, please cover your mouth and nose with a cloth face covering if you will be around others, and to continue your social distancing practices. The order does not require masks at this time.

Please continue to stay informed. Information and resources are available at www.vcemergency.com and Camarillo-specific information can be found at www.cityofcamarillo.org/covid19.

Please stay safe and well, and be kind to others during this time. We are resilient and we will persevere and meet this challenge as a community, together. Thank you for your efforts.

Sincerely,

Tony Trembley
Mayor
